

## Clean Energy Partnership Metrics

	<b>Metric</b>	<b>Unit(s)</b>	<b>Geography</b>
<b>1</b>	Citywide GHG emissions	metric tons of CO2e	citywide
<b>1.1</b>	GHG emissions from electricity use	metric tons of CO2e	citywide
<b>1.2</b>	GHG emissions from natural gas use	metric tons of CO2e	citywide
<b>2</b>	Commercial building energy use	kWh, therms	citywide
<b>2.1</b>	Commercial building benchmarking results	Average ENERGY STAR score, Average EUI, Total EUI	buildings covered by ordinance
<b>2.2</b>	Commercial utility EE program utilization	Participation, incentive dollars, estimated energy savings, estimated cost savings	citywide
<b>3</b>	Residential building energy use	kWh, therms	citywide
<b>4</b>	Local or directly purchase renewable energy	mWhs	census tract
<b>4.1</b>	WindSource customers	count of customers, mWhs	census tract
<b>4.2</b>	Community solar garden subscribers	count of customers, mWhs	census tract
<b>4.3</b>	Rooftop solar	Count of interconnections, MWs, mWhs	census tract
<b>5</b>	Home Energy Squad visits	count of HES visits (rental and owner-occupied), estimated energy savings, estimated cost savings	census tract
<b>5.1</b>	Percent of eligible properties served by HES	percentage of eligible properties	census tract
<b>5.2</b>	HES-driven loans	count of loans, loan value	census tract
<b>6</b>	Low-income visits	count of CIP low income and WAP visits, estimated energy savings, estimated cost savings	census tract
<b>7</b>	Air sealing/insulation (ASI)	participation, estimated energy savings, estimated cost savings	census tract
<b>8</b>	Multi-family program participation	count of visits, count of dwelling units served, estimated energy savings, estimated cost savings	census tract
<b>8.1</b>	Percent of eligible MF properties served by MFBE	percentage of eligible properties	census tract
<b>8.2</b>	Percent of properties participating in MFBE that engaged in activity beyond audit & direct install (conversion rate)	Percent of properties	census tract
